What Does Qualpay Do?

Qualpay provides a fully-integrated, omnichannel platform that is easily adaptable to the individual needs of both businesses and developers, as well as partners such as Independent Sales Organizations (ISO) and Independent Software Developers (ISV). It combines a merchant account with the payment solutions that today's businesses require. For developers and partners, it provides real-time boarding and easy management of accounts. Also, Qualpay's reporting intelligence and data analytics allow our customers to quickly and efficiently manage their payment finances, thus saving them time and money. To put it simply, Qualpay allows for a better way to manage payments.

For more information on how Qualpay is inventing a new era of payment processing, visit www.qualpay.com .
